

School Creation Project

Native American History

We have learned about the history of the boarding schools and the attempts to assimilate Native American children into white culture. The boarding schools were very harmful to the children in many ways. Your task is to create a school that will improve the educational experience for Native American children. You may display your project in a Powerpoint slide show, Google Slides, or Prezi (at least 1 slide for each item below). Your project must include the following items:

1. Mission statement - the mission statement sets the attitude of your school and identifies the goals of your school.
2. Name, mascot, and logo. Draw these on a poster or powerpoint slide.. Explain why you chose these names, mascots, or logos.
3. Curriculum - the curriculum of your school is what is taught in class. The curriculum should support your mission statement.
4. Staff - what type of teachers and administration will your school hire? What type of personalities, qualities, or skills would you be looking for in your staff?
5. Discipline plan - identify the type of discipline system your school will use. How will you deal with students who do not follow the rules?
