

Schoolyard Stewards: Student Handout

Investigating the Impacts of Human Activity on Wildlife

Put on your investigator hats, it's time to explore your school yard and observe the human activities that are potentially impacting the health of the wildlife and ecosystem. As you walk around, write down anything you observe that may affect the air, water, or soil. After identifying these potential impacts, brainstorm some potential solutions to help remediate these issues and improve the health of your schoolyard!

Resource	Impacts	Solutions
Air	<ul style="list-style-type: none"> • Car/bus emissions 	<ul style="list-style-type: none"> • Avoid idling vehicles – educate students and parents
Water		
Soil
