

Problem Solving with Pattern Blocks

Task 1

- The shape with right angles goes in the middle.
- The trapezoid is not second.
- The shape with all acute angles is not to the left of the large rhombus, they are not adjacent.
- The hexagon is between the third and fifth shape.
- Which shape is not in the grid?

Problem Solving with Pattern Blocks

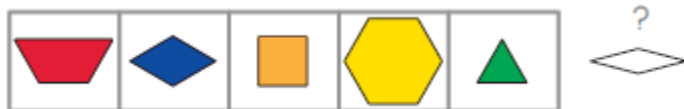

Task 2

- The shape with the greatest number of angles is not first, last or in the center.
- Neither of the rhombi are in the first two spaces.
- The large rhombus is directly to the left of the small rhombus.
- The triangle is one shape away and to the left of the trapezoid.
- Which shape is not in the grid?
