

Make a Meme!

A "meme" is something that's shared on the internet, and it usually has three parts: a picture, a caption, and a dash of humor.

1. Think of a meme that you want to create. You can do a search for what is out there to get ideas, but your final creation should be all yours!
2. Search for an image using "Labeled for Reuse with Modification". The image must NOT have any text on it. Save the image.
3. Go to easybib and cite the image.
4. Use one of the following websites to put text on your image. The end result is a meme! (You must use an image editing program, not a "meme" maker website) If you prefer a different image editing program, just see your teacher.

Be Funky
Pixlr
Google Draw (In your drive, go to New, Drawing)

5. Create your meme and upload it to your google site eportfolio (be sure to change the privacy of your meme (image) to "Anyone with the link). Then Insert, Drive, Image on the google site page.
